MAIN POINT

EXPLAIN WITH

Sorry, but the Cambrian Explosion basically kills the theory. Not to mention the fossil record, or the lack of feasibility of practical evolution even in simple organisms. 17 billion years ago, the first life forms were simple molecules. The Cambrian Explosion produced every major group of organisms. Trillions to one.

Wonderful exhibit

I respect the theory

Darwin's evolutionary theory is the only theory backed with sound scientific data. Evolution can be seen on micro- and macro level.

Just DON'T
Question Evolution!!

the cell requires over
1,000 processes to stay
alive - if one is erro-
red life - all 1,000+
must evolve at our
time = 000pp5

lack of feasibility of practical
evolution even in single-cell
organisms. It's like so
astronomically against the classical
theory, and even your current
adjustments have led to one.

highly against the classica
theory that it's not even a
contingent possibility. The
odds are billions to one.
